

# SIMS

(Ship Inspection Management System)

## How do I..... install SIMS on my PDA?

This document explains how to install SIMS on your PDA (or upgrade). Please note, once version 3 is installed on your PDA, all future upgrades are done automatically on-line.

1. In order to **install SIMS**, your device must have **Windows Mobile 6** operating system (or possibly version 5 may work but we haven't fully tested it yet). If we have provided your PDA, it will have Windows Mobile 6 so you can skip this step.
2. **Connect your device to the PC** using Microsoft Active Sync, the communication tool between the PDA and PC with the supplied **USB cable that came with the PDA**.
3. We will have sent you the software in a **ZIP file**. Unzip the contents to your chosen location on the PC or network.
4. Using Windows Explorer on your PC: **Backup** your existing **SIMS folder** on the **PDA** to the **PC**. After this is **SUCCESSFUL**, remove the existing SIMS folder on the PDA and all its contents.
5. Copy the new **SIMS folder from the ZIP file** on the PC to the \Program Files folder on the PDA. When complete, the SIMS folder should look like this:

Name	Size	Type
Email		File Folder
HelpFiles		File Folder
In		File Folder
Install Files		File Folder
Out		File Folder
SMS		File Folder
Portslist	286KB	Adobe Acrobat Doc...
TechnAdvSSC	76.3KB	Adobe Acrobat Doc...
TOOLBOX	253KB	Adobe Acrobat Doc...
PrCEDemo_NetCF	56.0KB	Application
SIMS-PDA	882KB	Application
SIMS-START	14.0KB	Application
OpenNETCF.dll	214KB	Application Extension
PrCE_NetCF.dll	286KB	Application Extension
PrintDC.dll	235KB	Application Extension
PrinterCE.NetCF.dll	52.0KB	Application Extension
System.Data.SqlServerCe.dll	249KB	Application Extension
SIMS	448KB	SQL Server Compac...
SIMSVBR	3 bytes	Text Document

6. Some of the **sub folders** may not show until you first run the software.
7. If the **PDA operating system** does not have the following installed, please contact us. A) Microsoft.Net compact framework 3.5 b) Microsoft SQL Compact 3.5. If we have supplied your hardware, you can skip this step as we installed these for you.
8. Run the system and select **OPTIONS** form the main menu. Please update/review all settings, then **SAVE**. **SIMS IS NOW READY TO USE**.
